Mr. Grote Reber,
Commonwealth Scientific and Industrial
Research Organization,
Tasmanian Research Laboratory
"Stowell," Stowell Avenue,
Hobart, Tasmania, Australia

Dear Mr. Reber:

I regret the delay in reply to your letter of September 26. We have now collected seeds of Dioscorea villosa and they are being mailed to you. I trust at least some of them may germinate.

I shall be interested in hearing more concerning your very interesting investigations.

Very sincerely yours,

Earl L. Core, Chairman
Department of Biology
