Dear Mr. Hamel:

Your letter dated 29/10/99, posted on 2/11/99 arrived on 11/11/99. Thanks. I've looked thru most of the voluminous literature you sent, and found it interesting.

I didn't know you had a wind tunnel. Is it a reentrant closed tunnel, or an open ended type? I may have some business for you. Also I may have something for HIA. Please send information on cross-section size and range of wind velocities of tunnel.

L. Higgs and I are friends of long standing. You may ask him about me. I have not and will not come to any conclusions about this matter soon. However I think about it from time to time. Let us keep in touch. I am,

Sincerely yours,

Grote Reber
