Wheaton, Illinois

Dear Bert:

Recently I arrived back here after three successful years in Tasmania. I am now continuing my observations from atop the volcano here.

Last August, while in Hobart, I sent to you a rather wild letter from my brother Schuyler, mainly so that you could see the kind of thing I've had to put up with. Since that outburst, I've heard nothing more from him and do not know his whereabouts except as probably Memphis. When I do locate him, I intend to call and find out in person, what all the excitement is about. In the meantime, please return to me this letter of his.

Also, I am informed that you have in your custody, one of the keys to my bank box at the Gary Wheaton Bank. Please return to me here this key via registered mail.

I wish to thank you again for taking care of my affairs in such fashion as you were able. Next time I'm on the mainland, I will stop for a short visit.

You might be interested in a rather descriptive article by me entitled "Radio Astronomy at Wheaton, Illinois" which will appear in the January issue of the Proceedings of the Institute of Radio Engineers.

Very truly yours,

Grote Reber
