

8th January, 1965.

Prof. Dr. H. K. Pratt,
Department of Vegetable Crops,
University of California,
DAVIS, CAL., U.S.A.

Dear Harlan,

Colour Patterns of Beans.

Dr. G. Reber (of U.S.A.) who is working in Tasmania on Radio Astronomy has a side interest in the genetics of colour patterns of beans.

Bruce Griffing of Canberra remembers faintly that someone at Davis had been interested in this subject. I therefore am writing to ask if you could locate this person and show him the enclosed slides and ask if the colour patterns Dr. Reber is getting are interesting or novel and worth pursuing.

I hope you enjoyed your year in U.K.

Love to Annie,

Kind regards,

Yours sincerely,

D. Martin,
Officer-in-Charge.
