UNIVERSITY GROUNDS,

SYDNEY, N.S.W.

28th April 1960

Mr. Grote Reber,  
General Delivery,  
Wailuka, Maui,  
HAWAII.

Dear Grote,

Bernard has shown me your letter of April 22nd.

You now have a clear statement of the difficulties of observations with the 19 Mc/s Cross and if, as you say, you still wish to give it a try you will be most welcome here. We shall keep the Cross in working order and Charlie Higgins will try to get started with some records in the south galactic polar region in June as you request. We shall aim to make this exploratory. Incidentally, with your departure ionospheric conditions have again deteriorated. It needs your benign influence. However, we hope this is merely a minor peak in a decaying oscillation.

We shall look forward to seeing you in July.

Yours sincerely,

  
J.L. Pawsey
