21st February 1951

Mr. Grote Reber,
P.O. Box 4868,
Cleveland Park Station,
WASHINGTON 8, D.C., U.S.A.

Dear Reber,

This is just a note to mention that we have had some correspondence with Hagen regarding the solar eclipse observations of 12th September 1950. We have just sent him copies of our records on 3 and 10 cm. over the same time. I have been assuming that you and he were working together on this but in case you are not in immediate touch I thought I should let you know so that you could arrange to see his copies of our results if they should be of any use to you. The information is not great - steady signals on 3 and 10 cm., and on 50 cm. (no record sent) a badly cut up record with a constant value whenever measured.

I hope things are going well with you.

Yours sincerely,

A handwritten signature in cursive script that reads "J.L. Pawsey".
(J.L. Pawsey)
