

7/8/61

Dear Mr. Reber:

Mr. Schauer passed through the office on his way from Canada to Los Angeles, read the enclosed two pages from Business Week, and suggested that copies be made to send to you for your information and as being of possible interest to you. Also enclosed is a letter which arrived here recently for you.

I shall be going on vacation next Friday (the 14th) for the rest of the month but someone here will open any letters which come from you and take care of requests. We have received an acknowledgment of receipt of your samples for radiocarbon dating analyses.

Sincerely,

*Jennie*
