Sun. Aug. 12

Dear Papa - Thank! you
very much for send-
ing the stamps on
Will you try to have
my bicycle fixed
by the time I come
back please You don't
have to send papers
for we have found
a place in the back
end of the post office
they come in at
11 o'clock / day late the
trouble in my bicycle is
in the water brake
in the back end when
it is fixed it works

when you pump you
go forwards and when
you pump back ward
you stop and when
you are going you
can stop peddling
and keep your feet on
the piddle and go on
coast along quite
far now it will only
coast around once
and if you pump back
backwards you go back
wards and in another
drawer in the table
you will find a piece
of paper with tells
the parts of the coast
brake and all you have
to do is to take the brake

to pieces and the parts
are shown and numbered
on the paper and find
the part that is broken
and buy another part
just like it at Sears
Roebuck and then put
it to gether again and
put the new part in
instead of the old one
and when you put her
to gether fill her full
of grease or vasoline or
some thick grease and
if you get her together
right she will work and
there is a guarantee in the
drawer so if you read it
over you may only need
to send the master brake
in and get a new one

for nothing I have used
it according to the rules
and I don't think it
should burst down so
quickly.

Your loving Son
Eustace
