Dr. Herbert J. Hall
Research-Cottrell, Inc.
Bound Brook, New Jersey

Dear Herb:

I wish to thank you and your staff for the kind and effective assistance provided me during the pleasant few days I spent at Finderyne. I was able to work out a design for a new and different type of radio telescope. Also tests were made on an old power tube which resulted in its effective revitalization. I hope to return in a year or so and construct this tube into an experimental power amplifier.

Enclosed are three reprints to help fill up your files. Please remember me to the fellows.

Best regards,

Grote
