Mr. M. H. Bennett,  
Tasmanian Regional Laboratory,  
C.S.I.R.O.,  
"Stawell",  
Stawell Avenue,  
HOBART, Tasmania.

Dear Sir,

With reference to your letter to Dr. Holloway (ref. MHB/NMD) of 26th October, which has been passed to me, I am pleased to advise you as follows.

The facilities available at this factory to organisations such as C.S.I.R.O. are now controlled by the 'Gamma Radiation Research Laboratory Control Committee' (of which I am secretary) which is now engaged in preparing a brochure describing the facilities available and the conditions of use; a copy of which will be forwarded to you as soon as possible. In the meantime, the committee wishes to be advised of any work being undertaken. If therefore you will write a short note describing the nature of the project and forward it together with the seeds, I will carry out the irradiation, which is free of charge.

Yours sincerely,

GAMMA STERILIZATION PTY. LTD.

J. P. A. Ridout
