Prof. T.A. Davis
Biometric Research Unit

Dr. Grote Reber,
"Stowell", CSIRO,
Stowell Avenue,
Hobart, Tasmania,
Australia.

Dear Dr. Reber,

I thank you for your letter and the interesting reprint. A copy of my note on the coconut yield in relation to direction of leaf spirals, appearing in "Experientia" is enclosed herewith. I am also recording the lefts and rights in about 25 species of Malvaceae and Bombicaceae and when the data inclusive of the yield is ready, I hope to send you a copy. I am also observing other Vines and screw pines. I will try to send you planting material of a clock-wise Vine as desired by you. I shall be obliged to receive samples of seeds from normal and reversed vines for my trial here. Any further reprint or reference on this subject will interest me immensely.

Sincerely yours,

T. A. Davis
