

June 14, 1961

Dear Mr. Reber:

Another batch of mail has been forwarded from Green Bank. Since some of it is pretty old, I'm forwarding it this way. About Mr. Landstrom's request: I have written him explaining why he had no answer to his request by the time he wanted it. However, I expect that the reprints he wants may be either in storage or in your possession. If he still wants them, what should we do about it?

By sea mail, I am forwarding some material from the National Academy of Sciences which arrived via Green Bank. One is something about "Project West Ford" about which they say reprints are being furnished to several hundred scientists who are invited to make observations. The other concerns a report entitled "Frequency Allocations for the Radio Astronomy Service." Again, comments ~~were~~ invited but they had to be received by May 22. However, it may still be of interest to you.

I am enclosing a list of ads and catalogs which have arrived in this recent batch from Green Bank. Would you please go over them and let me know which ones you would like to continue receiving. I will then change their addresses from Green Bank here - and ask those you do not want to remove your name from their mailing lists. I have a copy of the list so you need reply only by number of each item.

Hope you are enjoying your winter. Yesterday we had the hottest June 13th on record - 96°. And at 5:05 p.m. there was a power blackout over a huge area of mid-Manhattan which lasted more than four hours. Luckily, Chrysler Building was just outside the blackout area. It wouldn't have been much fun walking down 38 floors.

Mr. Schauer sends his best wishes and thanks for your letters. One of these days he will write but in the meantime I seem to be making up for it!

Sincerely,

Grote Reber - Material received via Green Bank

1. ABBEON Incorporated, Jamaica, New York
Humidification - dehumidification instruments
2. Bill Slep Company, Ellenton, Florida
Electronic equipment
3. New England Electrical Works, Inc., Lisbon, New Hampshire
Litz wire, braids and cables, magnet wire, bare wires,
electrical conductors to specifications
4. TRAINS Magazine, Milwaukee, Wisconsin
their ad is about book, "The Interurban Era"
5. The Macmillan Co., New York City
Ad on Vol. 6 of "Advances in the Astronomical Sciences,"
edited by Horace Jazobs and Eric Burgess (\$25.00)
6. John Wiley & Sons, New York City
technological books - in particular this time ads on:
"The Theory and Design of Inductance Coils"
"Essentials of Dielectromagnetic Engineering"
"High-Frequency Magnetic Materials"
7. Dover Publications - New York City
8. Electronics Book Service, New York City
9. S. Sterling Company - Detroit, Michigan
Electrical and electronic equipment
10. Keithley Instruments, Inc., Cleveland, Ohio
