

RESEARCH CORPORATION

DIVISION OF GRANTS
405 LEXINGTON AVENUE
NEW YORK 17

CHARLES H. SCHAUER
VICE PRESIDENT and SECRETARY

July 14, 1958

Mr. Grote Reber
General Delivery
Wailuku, Maui, Hawaii

Dear Grote:

It was good to hear from you again and get the current estimate on your prospects for getting into the continental limits again. I was intrigued and of course very pleased to hear that the Haleakala data are susceptible to mining under controlled conditions. We will be looking forward to the outcome.

I am relaying word to Emberson that you are still in the distant offing even though the distance is not changing as early as was forecast originally.

We will proceed with the Mullard order but admittedly with a few qualms. We haven't yet seen the other shipment threatened from there originally for mid-April.

I am taking to the bush again tomorrow and will be missing until the 20th or so of August, whereupon we start organizing for a meeting of our Grants Committee, at the invitation of Walt Roberts, just West of Loveland Pass. If you should be arriving in these parts during the week of August 25th, it would be nice to see you here in the office. If not, and you are beating your way eastward, possibly a stop in Boulder and Climax would be tempting to you and a visit with our assembled crew on the 4th, 5th or 6th of September.

In any case, I hope you will look up Bill Woods when you hit the West Coast. He is leaving Research

Mr. Grote Reber

July 14, 1958

Corporation the end of August but that influences in no way the possibility of your finding him interesting as well as reasonably well versed in your field. Our Western Field Office will of course continue; address: 1320 Second Street, Santa Monica; and Al Kelleher, who is taking over out there for a while, will be able to steer you on to Bill.

Best wishes,

Charles H. Schauer
