

RESEARCH CORPORATION

405 LEXINGTON AVENUE
NEW YORK 17

DIVISION OF GRANTS
CHARLES H. SCHAUER, DIRECTOR

January 24, 1956

Mr. Grote Reber
c/o Superintendent
Radio Research Board
Shirley Bay, Ottawa, Canada

Dear Grote:

Glad to hear that you arrived in good order at that comfortable summer resort. With such brisk temperatures to aid the circulation they really should charge more than we get hereabouts for the Lexington Avenue bus fumes.

It was very good to have you with us even though it was a rather hectic time and left something to be desired as far as personal discussions were concerned. The general congestion of our schedule here aside, it was a particularly fortunate time for you to be here and to have a chance to see the Grants Committee and vice versa.

One item which we had discussed in the Committee meeting before your arrival was the matter of the informality of your association with Research Corporation. You may have noted that you were listed on the seating arrangements for the dinner as a consultant to Research Corporation. In the other direction you have been good enough to indicate a Research Corporation connection on various publications of the past several years. It seems to all of us both desirable and appropriate to work out something which may do you a little more honor and possibly provide you with a little more satisfaction in maintaining the connection and establishing it on the more clearly understood basis. This will be something for us to talk over when you get back. My reason for making a point of it right now is to assert more definitely our own continuing interest and pride in the association.

We have suspended operations as regards the Silver-cells and will await with interest the next word on them. Best wishes on your continuing travels.

Sincerely yours,

Charles H. Schauer
