Mr. Grote Reber
Commonwealth Scientific and Industrial
Research Organization
Tasmanian Regional Laboratory
Stowell Avenue
Hobart, Tasmania

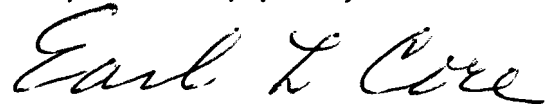

Dear Mr. Reber:

I have received your letter of November 16 and the manuscript of your paper "Reversed Bean Vines." I have no objection to publishing it, but I must say that comments reaching this office, concerning your previous paper, have ranged from "dubious" to considerably less complimentary. Perhaps the article was so startling in its nature that people are not willing to accept it and I certainly would not want to be one to delay the progress of research because of a seeming revolutionary idea. What sort of comments have you received?

Suppose we say that your paper is "tentatively accepted," pending further study.

Best wishes.

Very sincerely yours,

Earl L. Core, Chairman
Department of Biology
