Gentlemen:

Thank you for your letter of 3rd November 1955 and the Dakar ionosphere data which arrived here sometime ago. This data has been analysed for spread F and the results will appear in the June issue of the Journal of Geophysical Research. I will send a reprint in due time.

The data you sent me I have turned over to the Ionosphere Prediction Service in Sydney to keep in their library. They have not received any of your data in a long time and I am sure they would like to be put back on your mailing list.

Since Dakar is an important station in my study of Spread F, I would like to receive copies of the monthly data sheets giving hourly values of f^oF_2 only starting January 1955 and continuing to the present. They may be sent to me by sea, addressed as above. Thanking you again for your past assistance, I am

Very truly yours,

Grote Reber
