H Schneebeli and Co.,
Schaffhauserstrasse 370, 307
Zurich 50, Switzerland.

Dear Sirs,

We have been informed that you manufacture a Tree-Climbing Bicycle. Will this device operate properly on smooth hard wood poles from which all bark has been removed? The poles are 70 feet high. The diameter is 18" at base and 7" at top. Please send literature giving details, prices and delivery information.

Yours faithfully,

Grote Reber.
