

October 25, 1961

Dear Mr. Reber:

The diagram on the other side is the one mentioned in the following letter:

"In reference to your advertisement in Q S T Magazine, I have a radio which might interest you. Details are furnished as follows:

Serial No.- E61004- Kolster Radio Receiver Type 6-R
100-120 volts 50-60 cycle 50 watts

Tubes

Sockets- 1-2-3-5.....CX 326 or UX 226
Socket - 4CX 327 or UY 227
Socket - 6CX 371 or UX 171
Socket - 7CX 380 or UX 280

Manufactured by Brandes Products Corp. For Federal-Brandes Inc., Newark, N.J.

The dimensions of the radio cabinet are as follows: 54 inches high, 17 inches wide, 25 inches long.

A diagram is enclosed (see over) of the front of the cabinet and controls. The cabinet is very sturdy and in excellent condition. All components of the radio are intact and appear to be in good shape.

Please let me know if you are interested in this radio.

Yours truly,

(signed) David Engebretson, Prop.

Box #93, Valley Drive
Matawan, New Jersey

Mr. Campbell at Bound Brook phoned to say that the wire from Copperweld has been received. As I wrote you, the rods from Joslyn Co. are also in Bound Brook so we will await word from you as to what you would like to add to the shipment.

Sincerely,

Jennie

(See over)
