Mr. Grote Reber
General Delivery
Wailuku, Maui
Territory of Hawaii

Dear Mr. Reber:

We are now in position to measure the age of your carbon sample if you still wish to have it done. We make a charge of \$100 (payable to the University of Michigan, Phoenix Project #6).

Dating the lava flows sounds like an interesting project, and I hope that the age will turn out to be in such a range that the C^{14} method can be of value.

Sincerely,

H. R. Crane
