

19th May 1961

Jennie:

Your letter of the 5th, the pedometers, reprints, and book all arrived in good shape. Thanks a lot. Blake Yates letter of the 10th also arrived. I will answer him in a few days.

I'd forgotten that I was a member of A.I.P. Please have them send Physics Today to me at C.S.I.R.O. The c/o Max Bennett may be deleted now, as I'm here. Please send \$4 to the Botanical Club for another year. The rest of the organizations, I'm not particularly interested in.

The record should be considered a business expense as it will help grease the way here. I'll probably get reimbursed for it at this end.

Please find out and let me know the full name of Senator Goldwater and his address.

During the past month I've done a lot of excavating of aboriginal kitchen middens with good results. Presently I'm preparing the samples for dating. In a month or two you should receive a bill for about \$1700 from Isotopes Inc. plus the remains of the samples. I think it will be possible to find out with some certainty just when these people came from Africa.

You might check up and determine that the boxes from Maritime International Co. and James A. Smith actually arrived at Funderne in good shape. I'll want to use this material some day when I get things under better control here.

It is autumn here. The trees imported from the northern hemisphere are turning color and leaves are falling. The native trees are green all year around. These shed leaves slightly all year around but still show ring structure in the wood caused by wet and dry seasons.

I'll write again when there is something worth discussing.

Best regards,

Grote
