DIVISION OF GRANTS
405 LEXINGTON AVENUE
NEW YORK 17

CHARLES H. SCHAUER
VICE PRESIDENT and SECRETARY

January 15, 1962

Dear Mr. Reber:

We seem to be heading toward income tax time again. I note that last year I sent you various items in that connection, including the forms, on January 31 by sea mail. I will plan to do so again this year if that worked out all right. Evidently companies have had to notify the Internal Revenue Service of dividends paid. You have received several copies of forms sent with this information: F.W. Means & Company, \$70.00; Chesapeake and Ohio, \$800; Gary-Wheaton Bank, \$225. There may be others before the end of the month.

Speaking of income tax, you have received forms for West Virginia state tax returns, forwarded from Green Bank. There is no reason why you should be concerned with these for 1961, is there?

Other items received here since the last report include:

Reprints of articles by H. C. Ko, Ohio State University Radio Observatory:

Characteristics of Cosmic Radio Radiation
Temperature Concepts in Modern Radio
On the Determination of the Disk Temperature and the Flux
Density of a Radio Source Using High-Gain Antennas
Theoretical Techniques for Handling Partially Polarized
Radio Waves with Special Reference to Antennas
On the Response of a Radio Antenna to Complex Radio Waves
On the Analysis of Radio Astronomical Observations Made with
High-Resolution Radio Telescope Antennas

From the National Research Council (Ottawa): Coincidence of the Explosive Phase of Solar Flares with 10.7-cm. Solar Noise Bursts, by Arthur E. Covington and Gladys A. Harvey. Also their Oct. 1961 list of publications.

Copy of "The Naturalists' Directory," which the publishers say you ordered "some time ago."

Enclosed is a copy of Mr. Schauer's letter to Professor Williams.

Sincerely,
