

5/18/62

Dear Mr. Reber:

The enclosed reminder from the CBN Corporation refers to correspondence sent to you February 7 so I am not sending the duplicates which were enclosed with this May 11 letter.

You have received a request from: ^{DR.} Yukio Hakura, Hiraiso Radio Wave Observatory, Radio Research Laboratories, Nakaminato-shi, Ibaraki-ken, Japan, for reprints of:
Cosmic Radio-frequency radiation near one megacycle
and
Between the Atmospherics

Do you have copies there which you could send him (one of each)? We have only one file copy of the first-named, and while we have an extra copy of the other, I thought it might be better if you sent both if you have them. If you don't, we'll send him the one we have (Between the Atmospherics) and let him know the other is not available.

Jennie
