HI.

GLAD TO HEAR FROM YOU AND THANKS FOR THE INFO

KC	WAVELENGTH	1	2	3	COILS
750 To 1300	220-400	4	3	1	COILS
600 To 1000	300-500	1	2	3	COILS
500 To 750	400-600	3	5	2	COILS

ON MOON BOUNCE. HOWEVER I AM STILL LOST AS TO WHAT THE SIGNALS YOU RECEIVE HAVE BEEN. SUCH AS ARE ANY OF THEM ELECTROMAGNETIC WAVES. OR JUST COSMIC RADIATION OR RADIATION FROM THE ~~FROM THE~~ RADIATION BELTS AROUND THE PLANETS.

YOU MENTION ONE WHICH IS NOT EFFECTED BY THE BEAT OSC. I CANT UNDERSTAND HOW A SIGNAL WHICH CAN BE DETECTED BY A RECEIVER WHICH WOULD HAVE TO BE R. F. BUT CANT BE BEAT WITH AN OUTHER R. F. SIGNAL I AM SURE YOU WERE USING SUPERHET RECEIVERS SO THE SIGNAL HAD TO BE CHANGED IN FREQUENCY BY THE LOCAL OSC.

IF I UNDERSTOOD THE ARTICLE CORRECTLY THIS INTEREST ME VERY MUCH. I HAVE HAD A THOUGHT FOR YEARS THAT THE FIELD AROUND A MAGNET COULD BE DETECTED. THERE WAS A SCIENTIST BROUGHT OVER HERE AND GIVEN A LAB TO WORK IN WHO CLAIMED HE HAD FOUND "MAGNETIC CURRENT" BUT I HAVE NEVER HEAR ANY MORE OF HIM.

WELL BEST 73s *Harold*
