

SOUTHERN  
APPALACHIAN  
BOTANICAL CLUB DISTRIBUTION OF PLANTS

WEST VIRGINIA UNIVERSITY  
MORGANTOWN, WEST VIRGINIA  
January 23, 1963

Dear Member:

Last April a package containing the 19th DISTRIBUTION OF SOUTHEASTERN PLANTS (49 specimens) and the THIRD DISTRIBUTION OF NORTH AMERICAN PLANTS (8 specimens) were mailed to those members who participated in this project. This has been an interesting project for those who have helped make it successful.

We can have bigger and better sets when we have more members participating. Should you be interested in taking part in this project let me know and I will send you any information needed. We try to prevent using duplicates. We put our number only on the native species. I can send you a list of the species used in previous sets. As it stands today, we need about 50 specimens of each species.

We have a few of the back numbers. Members often trade extra sets for our previous Distributions. Should you be interested, let me know and I can let you know what we have on hand. By the way, these are also sold at ten cents a specimen.

For those participating in the 20th DISTRIBUTION, could we have the specimens sent in by the last of February?

Sincerely yours,

*Elizabeth Ann Bartholomew*
