11th March, 1964.

Mr. G. Reber,
C.S.I.R.O.,
Tasmanian Regional Laboratory,
Stowell Avenue,
HOBART. TASMANIA.

Dear Mr. Reber,

Arthur Yates and Company of Brisbane have forwarded me copies of their correspondence with you about the effects of twining on yield of legumes. The season is too far advanced to do anything about this now but if you are still interested I suggest you write to me in October. I will do what I can to put down a small experiment for you.

Yours sincerely,

R. J. Williams
