Mr. Grote Reber  
General Delivery  
Wailuku, Maui, T. H.

Dear Sir:

Thank you for your interesting letter. At present we are limiting our dating of samples to series of general methodological interest along lines which have been laid down by members of the Board. Since these samples require all our available time, we are not now dating samples for a fee.

However, I understand that the laboratory at Lamont Geological Laboratory is dating samples on a commercial basis. I suggest you write to them at Lamont Geological Observatory, Columbia University, Palisades, New York - Dr. J. Laurence Kulp.

Yours sincerely,

*Henry L. Kraybill*
