Gentlemen:

Presently I am writing up my observations taken over the past several years. Enclosed is a short reprint giving a synopsis. One of the phenomenon which I wish to mention is diffraction over the sea horizon. The only discussion related to the matter which I can remember is

"Diffraction of Plane Radio Waves by a Parabolic Cylinder", S.O.Rice, Bell System Technical Journal, March 1954, Vol 33, pp 417-504.

I would much appreciate receiving a reprint so that I may refer to it in my discussion. Unfortunately, there are no facilities at this remote place for me to secure such an article.

Very truly yours,

Grote Reber
