Ref: Yours of 5/11/82

Dear Dr. Kerwin:

Recently the news on radio discloses the recession is over in Canada and the Canadian economy is expanding rapidly. Perhaps now is an auspicious time to approach parliament for initial funding for the CLBA. When this transpires, I'll probably have an additional donation to make for this most worthy project. I also note the latitude of CLBA is about optimum for hecto (hundred) meter radio astronomy observations. At some future date this facility might be added to each dish installation. Now is not the time. Solar activity is still very high. We have quite spectacular auroras here every month or so.

The enclosed xerox appeared in Physics Today, Nov. 82, p 108 & 9. The response was surprising. The university received over 70 requests. These came from 24 states in USA plus 10 other countries. Physics Today really gets around. A peculiarly large number were attracted by the religious aspect. Perhaps God is not dead yet!

Best wishes for a stable universe!
