OF PHYSICS

28 September 1953

Mr. Grote Reber  
Wailuku, Maui  
Territory of Hawaii

Dear Mr. Reber:

I have delayed answering your letter because we have been re-building our counting equipment and have not been in a position to run samples. We are now operating, and will run your sample if you think it will tell you what you want to know. The dates we can get for relatively recent samples are accurate only to about plus or minus 300 years. If yours is only a few hundred, or perhaps 500 years old, I do not think that a carbon date would be accurate enough to be of value. This is something you will have to decide.

We make a charge of \$100.00 per sample.

Sincerely yours,

  
H. R. Crane
