Dr. Harold D. Babcock
Mount Wilson & Palomar Observatories
Pasadena, California

Dear Dr. Babcock:

Your article on page 1058
of Science for second of May interested me
greatly.

Enclosed is a reprint of an article
entitled "World Wide Spread F". At the bottom
page 160 I noted that some change in the solar
magnetic field would assist the explanation
of the observations.

Very truly yours,

Grote Reber
