MOUNT STROMLO
CANBERRA
A.C.T.

Dr. Grote Reber
Tasmanian Regional Laboratory, C.S.I.R.O.,
Stowell Avenue,
Hobart, Tas.

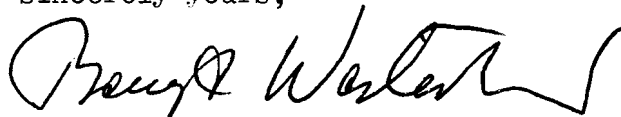

Dear Dr. Reber,

Prof. Bok has told me about the two dark patches that you have found in your survey and that may be due to ionized hydrogen. We intend to photograph the two fields with the 8-inch f/1 Schmidt camera and with the Uppsala Schmidt telescope. As soon as I have any results I will let you know.

I am in charge of the organization of colloquia at Mt Stromlo. We would very much like to have you come here and talk to us about your work. Our colloquia are generally held on Tuesdays, between 3.15 p.m. and 4.30 p.m. The Observatory would, of course, take care of your travel expenses and your accommodation in Canberra. With regard to the ANZAAS Meeting in Sydney in the second half of August I would suggest any time in September or later as most suitable. However, if you plan to leave Australia before that time or if you find that an earlier date would suit you better, it will certainly suit us, too. Prof. Bok, Dr. Gascoigne, Dr. Rodgers and myself will be away during most of June in connection with site-testing in Western Australia.

I hope to hear from you soon.

Very sincerely yours,

/Bengt Westerlund/
