Green Bank
West Virginia

Dear Mr. Simpson:

Many thanks for your note and enclosures about the Infradyne receiver. I gather the part you have is the 3500 KC amplifier shown in upper right position of top view of assembly. This will be of some use to me altho I had hoped to secure the entire receiver or parts for same.

The pamphlet states a price of \$27.50 for this amplifier. Since you say it is new and still in original box, I can offer you this much if you will pay the parcel post and insurance getting it to Green Bank. If you can locate any of the other pieces such as R.F. Tuner, the oscillator coil and condenser, dials, Silver Marshall audio transformers, case, etc. please let me know.

I am holding your literature until I hear from you and will return same at your request. If the above is OK, I'll send a P.O. M.O. upon your acceptance. When the results of my measurements

are available, I'll send a copy to you, so that you can see what the performance of the unit is.

Enclosed is a copy of Ham Trader. On page 3 is an ad for wireless equipment in use during the period you operated 2AB. If you contact this fellow he may have something worthwhile.

73,

Grote Reber
