

13/12/82

Dr. Lloyd A. Higgs, Director  
Dominion Radio Observatory  
P.O. Box 248  
Penticton, B.C., Canada  
V2A 6K3

Greetings Lloyd:

Your letter of 23/11/82 and enclosure arrived promptly on 2/12/82. The thesis by Lo is indeed impressive. I've read most of it; but confess some parts are a bit beyond my antiquated background. I am happy to leave the details to young minds. I like the comments on page 125, second paragraph. The only trivial error I noticed is second word, first line, page 1. Jansky used the german spelling Karl.

A year ago I did ask to remain anonymous, mainly to prevent people writing to me for money. However, I'm so far away such seems unnecessary. I'll be pleased to have you write an appropriate article for local newspaper. Enclosed is an extra passport foto taken about five years ago. I haven't changed much since then. Please keep the amount of my donations confidential.

Also enclosed is a blurb about me and Royal Society of Tasmania. They claim to be second oldest scientific society in British Commonwealth, started 1847. I have my doubts. It seems probable there are older societies which can be called scientific in Canada. You probably have, or can secure information readily about this subject.

Since mine of 14/4/82, I've accumulated the following about sunshine.

Year	Month	Percent Sunshine	
1982	April	66.4	} 179.9/3 = 60.0 winter
	May	----	
	June	49.7	
	July	61.9	
	August	68.3	
	Sept.	69.0	
	Oct.	72.8	
	Nov.	82.8	

When I get to Penticton, I'll give you an illustrated lecture about my solar heated house. *My electric bill for entire 1981 was A# 177.92*

Best wishes,

*Grote Reber*
