

RESEARCH CORPORATION

DIVISION OF GRANTS
405 LEXINGTON AVENUE
NEW YORK 17

CHARLES H. SCHAUER
VICE PRESIDENT and SECRETARY

February 7, 1962

Dear Mr. Reber:

Enclosed is a letter and its enclosures from Columbian Carbon Company (now CBN Corporation). It seems to require some action on your part in connection with certificates of stock.

The Committee on Radio Frequency Allocations for Scientific Research of the National Academy of Sciences has sent a memorandum to "Contributors to 'Frequency Allocations for the Radio Astronomy Service - A Statement of Position, June 1961,' calling attention to three documents issued by the FCC as follows:

Docket No. 14475 - Amendment to Part 2 of the Rules and Regulations to modify the existing frequency allocation provisions for the radio astronomy service.

Docket No. 14476 - Amendment of Part 2 of the Commission's Rules & Regulations to insert provisions for the notification of the International Telecommunication Union relative to radio astronomy observatories and frequencies involved.

Docket No. 14477 - An Inquiry into the Allocation of Frequency Bands for Radio Astronomy.

The Committee states further that the complete texts may be obtained from the FCC and that all documents invite comments submitted to the Commission on or before February 26, 1962.

Is this a group of which you are a member, or shall we just ignore future correspondence concerning it? There is hardly time to get any documents to you and replies thereon submitted within the time limit.

Sincerely,

P.S. You have received a reprint of Chapter 12 entitled "Radio Emission of the Moon and Planets," by Cornell H. Mayer, Radio Astronomy Branch, U.S. Naval Research Laboratory, from the book: THE SOLAR SYSTEM. Vol. III: PLANETS AND SATELLITES.
