DIVISION OF GRANTS
CHARLES H. SCHAUER, DIRECTOR

May 3, 1956

Mr. Grote Reber
GPO - Hobart
Tasmania, Australia

Dear Grote:

Thanks for your interesting letter of April 18th and its enclosures. In response to the less important aspects of it, I enclose copies of the transmittals of the checks for \$4,000 and \$2,500 respectively to your accounts in the National Bank of Australasia, Hobart, and the Harris Trust and Savings Bank in Chicago.

On more important aspects, I was glad to get the inference that your equipment is in hand for the cable operations across a valley and the testing for the Y hole. Also, I was glad to get the reprints and am happy to report that some research by Miss Ewanoski turned up the information on the Journal of Geophysical Research and the abstract of yours and Ellis' paper in that. We shall try to keep an eye peeled for the June issue and the "World Wide Spread F."

Incidentally, I have received a copy of "The Changing Universe," by John Pfeiffer. The extent to which I have gotten into it indicates a highly readable review of radio astronomy to date and some guesses at its current developments.

We shall be interested in hearing from you when you have further developments either of radio astronomy or travel in hand. Of course, if there is anything further we can do at this end, don't hesitate to yell.

Best wishes,

Charles H. Schauer
