

Fayetteville Ind.
June 29 1959.

Mr Frote Reber
Green Bank West Va.

Dear Mr Reber.

Received your letter and was happy to learn that the old sets reached you O.K. and that you were fairly well satisfied with them. as you remarked, ~~that~~ age and improper storage does not help matters as far as components are concerned.

The sets numbered 1, 2, & 3, are in nice condition especially the ones in cabinets and the other one is good except for the fact that it is not in a cabinet.

In regards to your offer of \$40.00 each for the above sets I have an o.k. on this deal and await shipping instructions which I presume will be the same as before.

I have a very good friend here by the name of Wm. Birkemeyer who is in the process of completing his

thesis that will give him his
Doctors Degree in Electronics.

He is leaving in about one month
for Fayetteville ark. where he
will be a prof. in charge of
something or other ^{at the university}. I am not sure
just what the deal is but I do
know that his field is "Mathematics
of Radar" -

any way he read your letter and
was greatly interested in knowing
more about you and what you
do. why you are interested in old
radios and by chance do you have
any thing to do with the Radio
Telescope deal that is going
in down there. please don't think
we are nossey but rather that
we are interested - so if you
care to tell us a little about
yourself - we would appreciate
it -

Yours Very Truly
Leslie A Galloway
