Subject: 3C353 Alabama Draft

Here's the current draft, sized for our 6-page limit. The figures are still in production, and most particularly need to have axes and angular scales added, and the drawspec gobbledygook subtracted. What is included here should give you the basic picture, however and we'll E-mail .PS files when they are done.

Fig. 1 will be a glossy b/w photo, the image is file #67 on the enclosed DAT (which has all of the basic images from the project).

On fig. 2, the FWHM is 2.75 slice pixels.

3 .. .. . 4.0 " ..

5 .. .. . 2.75 slice pixels

and on all 3 the vertical scale is ~~1~~  $\mu$ Jy per beam.
