Mr. Grote Reber
Green Bank W. Va.

Dear Mr. Reber.

I am very sorry that I did not get around to answering your letter of the first of May but it seems that in running a washer and power mower repair shop it is pretty easy to get snowed at this time of year.

I was interested in your run down of the types and circuits of the various sets and I can tell that you know your way around on early radios. Well to get down to the offer that you made in your last letter, I can say that I talked to my friend Mr. Gordon Smith who owns the sets that we are interested in and I read your letter to him and he is willing to accept the offer.

If it is agreeable to you it will be O.K. to make out the check to him and mail it to me along with shipping instructions and I will get the sets crated and packed and get them on their way to you as soon as possible.

I might add that if you know of anyone that might be interested in the rest of this old radio gear I would like to hear from them as it is for sale. I may run an add later on in P.S.T. and see what I can come up with. I would ~~be~~ consider trading for Ham gear such as receiver or transmitter set.

I am using at present for S.W.L. a Scott Marine Rec. ~~Mod~~ Mod 5LRM which is a twelve tube AC-DC that tunes to 18.6 Mc. and while it is 1945 vintage it does a real nice job from 160 thru 20 meters and every thing in between including an excellent

standard Broadcast band.

Well so much for that and
will say that when you are
ready for the No's 7, 8 and 9
sets that I will do my best
to prepare them so they will
get to you in good condition

Yours Very truly -

Leslie A. Galloway
