TRADE MARK

POST CARD

Down in the granite Gorge you can see the river and in the distance the North Wall and the plateau beyond and all between is a panorama of peaks and minarets, pinnacles and towers, castles in Spain and fairy turrets. Here are glowing colors and high lights, shadows and clouds blended by a blue haze like on the highest mountain peaks and over all is silence.

COPYRIGHT BY FRED HARVEY

The river you see is 300 ft wide and 30 to 40 ft deep. waves in rapids are 8 to 10 ft high; very muddy as the erosion is so great. Canyon is 2 1/2 mi. long + 1/2 mi wide at this point. Mississippi river basin - greatest - Columbia - next + Colorado is third - another.

STAMP

Grote Reber
