

6th August, 1963.

Director,
Royal Botanic Gardens,
SYDNEY, N.S.W.

Dear Sir,

Index Seminum lists on page 1, Dioscorea
transversa. If this plant twines in a clockwise
direction (left hand screw thread), and has large seed
pods, I would be interested in securing a few growing
specimens or roots or seeds. Please advise me of the
present situation. Do you have any other plants with
these mechanical characteristics?

Yours faithfully,

Grote Reber.
