

RESEARCH CORPORATION

DIVISION OF GRANTS
405 LEXINGTON AVENUE
NEW YORK 17

CHARLES H. SCHAUER
VICE PRESIDENT and SECRETARY

July 8, 1964

Dear Mr. Reber:

I think I'm still here but am leaving on vacation this Friday. I have written concerning your Michigan map and map index and am leaving word with Mrs. Gormley (AK's secretary) to send these on to you if they come in. Sounds as though you were thinking of returning to our fair land.

Mr. Schauer is on vacation up in Canada this week but will return this week-end. Jeff goes into the hospital next Monday for what they think will be the last operation on his hand. I'll leave your letter of July 3 (which arrived this morning) on his desk.

Your voting registration card is enclosed. Incidentally, that same envelope held your social security card (just in case you might be worrying about its whereabouts).

John Gardner's book, "Self-Renewal: The Individual and the Innovative Society," has been mailed to you. From your reports of dates when you receive various items, it seems to take about two months to get down there.

I noticed that checks from a couple of new sources have recently been deposited in your Harris Bank account. ~~But~~ I don't suppose the bank could make a mistake but just thought I'd report it. The checks were from: The Union National Bank (\$25.00) and Luce and Company (\$80.00).

I will try to append a list of items recently received here for you before mailing this. By the way, the reason I kept sending you stockholders reports was because you once requested them. I'll hold them here in accordance with your more recent request.

Sincerely,

Items received for Grote Reber

1. The Franklin Institute - Laboratory Report
2. Measurements of the Galactic Polarized Radiation at 75 CM,
by Elly M. Berkhuijsen and W. N. Brouw (from the Observatory
at Leiden and the Netherlands Foundation for Radio Astronomy)
3. Publications of the Owens Valley Radio Observatory (Cal Tech):
A compilation of Radio Source Flux Densities, by
Kenneth I. Kellermann
4. Observations of the Owens Valley Radio Observatory:
A Discussion of Galaxies Identified with Radio Sources,
by T.A. Matthews, W.W. Morgan and M. Schmidt
5. Linear Polarization of the Centimeter Radiation of
Discrete Sources, by C. H. Mayer, T. P. McCullough, and
R. M. Sloanaker (from The Astrophysical Journal)
6. Observations of Venus at 2.07 cm,
by T. P. McCullough and J. W. Boland (from The Astronomical Jr.)
7. Edmund Scientific Co. Catalog

P.S. I am not sure I ever reported to you that Harris Trust
and Savings Bank had, as you instructed them, sent a check
to the Internal Revenue Service along with your 1963 tax return.
But I expect that you assumed that they had taken care of this.

I am sending χ along a few items which may or may not be of
interest to you.

J.E.
