

RESEARCH CORPORATION  
A FOUNDATION  
405 LEXINGTON AVENUE NEW YORK, NEW YORK 10017

CHARLES H. SCHAUER  
VICE PRESIDENT AND SECRETARY

May 24, 1965

Dear Mr. Reber:

Literature is beginning to come in in response to your request for catalogs, etc. on oscillographs, recorders, etc. I have re-read your letter and do not find that you have request<sup>ed</sup> it be forwarded to you by sea mail. Since you may not want it there at all (I seem to recall your writing once that you would be coming this way this year), I thought I'd better inquire before sending it, since it seems to take quite a while to get to you. So, please let me know.

By the way, one of your requests was for info on "high speed recorders" from Graphic Controls Corp. They replied that<sup>they</sup> did not manufacture recorders. They make recording charts. Do you want information on that?

You have received another issue of CASTANEA (March) although it has been some time since I wrote that you did not want to renew your membership. Do you want this issue sent to you?

Other items which have come in are:

The 1964 Annual Report of The Franklin Institute.

Observations of the Owens Valley Radio Observatory (Cal Tech):

- 1) An Interferometric Investigation of the Neutral Hydrogen in Galaxies, by G.A. Seielstad, J.B. Whiteoak and V. Radhakrishnan
- 2) An Interferometer Investigation of the Twenty-one Centimeter Hydrogen Line Absorption, by B.G. Clark

No word yet concerning the contact prints you wanted, but they're not usually very speedy. I assume that these you do want sent to you as soon as they come. Any urgency? Do you want them air mail by any chance?

Sincerely,
