350 Fifth Avenue
New York 1, N.Y.

Dear Dick:

For my own information, I asked Donald Kennedy last week to write me a letter and state in it briefly his own attitude and that of Bob Grenseback with regard to the feasibility for a 140-foot equatorial mount. I have just received from him this morning the enclosed letter, dated June 22nd, which had attached to it his letter addressed to you of January 31. I thought that you would find it helpful to have a copy of the June 22nd letter for your files and I am therefore sending it along with this letter. I am also giving copies to John Hagen (marked "personal") and to David Heeschen, but will do no further distribution in advance of the July 11th meeting. If the matter should come up at that time, I shall have available — if needed — about six extra copies of the letter, but I definitely do not wish to distribute further copies in advance of the July 11th meeting.

Very sincerely yours,

Bart J. Bok
