11th May, 1983

Dear Colleague,

I have been asked to provide a report on Australian radio astronomy for the URSI Review of Radio Science 1981-1983, which is to be distributed at the Florence Assembly.

The space available for the whole of radio astronomy is very limited so it will only be possible to include highlights from this period. If you could therefore let me have a list of publications for what you feel are the most important contributions from your group, I will be able to include them. To do this I must have them no later than mid-August next.

I am also giving fair warning that I would like to have a full publication list later in the year for inclusion in the more complete Report on Radio Astronomy produced as a separate document by the Chairman of Commission J. I will give you a reminder later about this, but in the meantime if you can let me have the most important contributions as soon as possible I would be very grateful.

Yours sincerely,

Associate Professor A.G. Little
Australian Representative,
Commission J., URSI
