

October 18, 1962

Dear Mr. Reber:

No word from you so perhaps you did not get the letter I sent to the Skyline at Vancouver, with copy to Penticton.

I had sent copies of letters from Gary-Wheaton Bank, and indicated that if you did not have the Stock Certificate with you and if you would let me know, I'd dig it out of your personal envelope and send it to Australia. The original letters are now enclosed herewith. (\*)

We have received a check for \$8.50 from the University of Virginia Hospital; this is the amount of the overpayment on your bill there. It is made out to Research Corp. What do you want done about it?

This morning the enclosed bill came from Dr. Fitz-Hugh. What was the final result of the operation?

Elliot Sivowitch, Museum Technician, Div. of Electricity, Smithsonian Institution, writes: "A check of our catalogue cards does not show a UV-208 vacuum tube or a French type L-2 radio frequency amplifier in the Museum's collections. However, we are in process of cataloging the rather large Wingard Collection recently donated to us, and if either of these items is found we shall be in touch with you."

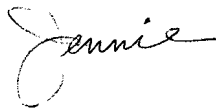

Also enclosed is a letter from NIFE INC. (of Oct. 9).

By sea mail I am sending you several letters (including photos) from J. H. Stegner. You should <sup>be</sup> getting the pkg. sent to you on Sept. 28. It had to go parcel post because we couldn't insure printed matter.

Did you decide not to fill out the questionnaire from the American Institute of Physics? They have sent another follow-up.

Mr. Schauer sends his regards. He has just returned today from a trip to Maine and Advisory Committee meeting in Vermont.

Sincerely,

(\*) Am enclosing only the October 2nd one. The Sept. 27th one merely acknowledged your letter of Sept. 24 and noted Weisse's intention to find purchasers of your stock. He also added: "I will convey your kind thoughts to the Hon. Bert E. Rathje the next time I see him."
