

Dear Gite:

Oct 16, 1966  
Rec'd 27th.

How nice to receive your interesting printed copies of your work. I could not understand too much about the scientific one, but enjoyed knowing of your progress! The excavating which you did sounds fascinating - It just does not seem possible that you have been in Tasmania for seven years. This printed matter which came by sea took from 10 Aug to Oct 3 - quite a while. This letter should get to you in a couple of weeks or sooner, as a letter to Paris from Wheaton took five days recently when Molly & I took a little jaunt over to London, Paris, and Amsterdam. In fact, we have only been home a bit over a week. Jack could not get away so we will travel out of the country after the first of the year - Molly & I flew BOAC to London on Sept 19 and had six beautiful days in England. 66° + leaves turning red + NO RAIN, Can you believe it? Then a week in Amsterdam via KLM. + Then a name train to Paris for a week - Fun for us! Jack has started his last year with his Company. He will be in a Consultant position, but at full salary. as of Oct 1967, we should be able to get away on our world trip + if you are still down under, who knows, we might meet. Sky Piker was in Chicago, but we did not hear from him last week. Ed Varley told us. Dad is keeping up at 89 + while he rides outside in a chair, he walks around inside + up + d. stairs every day. Lane Hank is still with him - Wheaton is growing so much. all is well here + Tho early, we wish you a MERRY CHRISTMAS and will be thinking
