

RESEARCH CORPORATION

DIVISION OF GRANTS
405 LEXINGTON AVENUE
NEW YORK 17

CHARLES H. SCHAUER
VICE PRESIDENT and SECRETARY

October 28, 1963

Dear Mr. Reber:

Under normal conditions, this letter would have been written (dictated) by Mr. Schauer "because it relates to money." However, what with trips out of town and meetings -- staff, Board, Grants Committees -- there just hasn't been time for letters. Before he left for California, where the Advisory Committee is meeting today and tomorrow, he asked me to write you. He is going on to other places and will not be back here until mid-November.

The Directors have approved payment of the \$27,460, in accordance with your statement of June 21, as well as your budget for next year as outlined in your letter of August 30.

Will you let Mr. Schauer how you would like to have this handled -- whether transferred to your account in Australia, deposited in the Chicago bank, or what.

Mr. Schauer also wanted to thank you for the offer of your hearing aid. I don't have the latest on Jeff's hearing difficulty, but apparently they are still trying other things. He is gaining strength and pounds and hopes to be able to return to Colgate for the spring semester. Meantime, he keeps his hand (mind) in by taking Russian at an adult education center in White Plains. He has joined Mr. and Mrs. Schauer on this trip to California.

Mr. Ritchings in Patents reviewed the section you specified in your NSF proposal, but reports it is not worth trying to patent....The axles and wheels for the reproduction of Jansky's antenna were taken out of storage by one of the men at R-C, and Bell Labs picked them up at the Finderne plant about ten days ago.

I wish we were coming into spring now. However, our turn will come.

Sincerely,

Jennie
