

30th July 1965

Greetings Jennie:

Your letter, three envelopes and package mailed on 9th June all arrived on 20th July. These contain Castanea, covering letters, catalogs from Sanborn, Brush, Alfax and Texas Instrument. Printed material and first class come same speed by sea. The Esterline Angus catalog and Cal. Tech. Quarterly mailed on 16th June arrived on 22nd July. Please write for information and prices on model 1108 Visicorder oscillograph from Honeywell, 4800 East Dry Creek, Denver, Colorado, 80217. They may have a NY office more convenient.

The literature from Raytheon arrived on 8th July. I found a glaring error, so on 15th I wrote direct to Raytheon, Semiconductor Operation, 350 Ellis Street, Mountain View, California. Their Mr. D. W. Hollenbeck replied with correction on the 19th. These devices seem to be useful for apparatus design I am now doing. Please order two each type FN1024 and FN1034 field effect transistors to be sent here direct by air. They are very light weight. Don't let them push you off on their Australian representative. If necessary, have the goods sent to RC for readdressing to here. The NYC district sales engineer is E. Ziegler, 210 Sylvan Ave., Englewood Cliffs, N.J., 07632, phone 201-567-4911. A Manhattan number is given as 212-Wisconsin 7-6400.

Please write to Sylvania, R.C.A., Texas Instruments inquiring for literature and prices on their field effect transistors. Fone calls to NYC offices may be a good start.

If you are on vacation, maybe someone else can take care of these matters.

Best regards,

*Grote Reber*
