

RESEARCH CORPORATION

DIVISION OF GRANTS
405 LEXINGTON AVENUE
NEW YORK 17

CHARLES H. SCHAUER
VICE PRESIDENT and SECRETARY

October 10, 1961

Dear Mr. Reber:

You will remember my writing that the Edison Company had declared a stock dividend, and it seems that you are entitled to 4 and 6/25th shares. Enclosed is a card which you may or may not return. If you want to round out the fraction of a share, you should mark Box 2 and they will bill you for the additional amount due. If you want to sell your fraction, either check Box 1 and return, or ignore the card and they will sell your fraction, which cannot be distributed. You can also, by checking Box 3, have them sell any or all of your full shares along with the fraction. If you decide to return the card, it should be mailed to arrive by October 26, addressed to:

Continental Illinois National Bank
and Trust Company of Chicago
Lock Box H
Chicago 90, Illinois

Mr. Robert Anderson, 910 West Locust St., Belvidere, Illinois, writes that he has an "old RCA Westinghouse one tube receiver in wooden cabinet, and two stage audio amplifier in matching cabinet - both laydown style, in very good condition. About 1920-25 vintage. Serial #129883, style #326032 stamped on inside of cover. Complete with original instructions, tubes, Brandes headphones and curved speaker. Can furnish references and photos. Is this of any value to you, and what am I offered?"

I am telling Mr. Anderson that the information is being forwarded to you.

The 6 bundles of rods from the Joslyn Company have been received at Bound Brook. Copperweld Steel Company said delivery would be in about six weeks (from 9/19), which would make it around the end of October.

Isotopes have written and have called Mr. Schauer to say they had sent you the analyses on all except the last couple of samples, which they expect to finish up this week. So you should either have them or be receiving them shortly. Perhaps someone neglected to send them air mail.

I hope you received my letter of September 19, in which I inquired what you wanted to do about the SILASTIC bands and washers.

Sincerely,
