December 4, 1959

Mr. Grote Reber
% National Radio Astronomy Observatory
P.O.Box 2
Green Bank, West Virginia

Dear Mr. Reber:

I have just read two of your reports, Age Of Lava Flows On Haleakala, Hawaii and Temperature And Humidity Atop Haleakala, which you sent to Fred Russell.

We are always interested in such articles for our library here in Hawaii National Park. If you should have any extra copies of these or any others of your findings and results of your experiments on Haleakala, we would really appreciate having you send us one of each. We will be happy to pay the postage and any handling costs that may be necessary.

A park naturalist position was established in 1958 in this section of the park for the purpose of developing an interpretive program. Any information, such as the age of lava flows, is of interest to this program.

There is a nice new headquarters building at Haleakala with a lobby and information counter, three spacious offices and restrooms. The little old stone office building was torn down after we moved into the new one in November 1958.

Please let us know if there is anything that we can do for you in return for sending us your publications.

Sincerely,

Robert W. Carpenter
